NILIT® BODYFRESH

Nilit® BodyFresh. High-performance antibacterial yarn when performance counts

Active, outdoor lifestyles call for high-performance wear that acts against body odor for increased comfort, confidence, and cleanliness day and night.

It's fresh...

NILIT® BodyFresh provides increased freshness through effective antibacterial action. It gets rid of common bacteria that cause unwelcome body odor and the accompanying discomfort.

It's comfortable...

NILIT® BodyFresh promises added confidence through effective odor control. The microfiber yarn delivers a smooth, comfortable feeling and is ideally suited for outdoor clothing, intimate apparel, and activewear.

It's durable...

NILIT® BodyFresh is extremely resilient and stands up to tough treatment. Because the antibacterial additive is present in the polymer (and not added to the finished fabric), it retains its antibacterial properties through numerous washings.

It's versatile...

Offered in a range of yarn counts, NILIT® BodyFresh enables design flexibility in creating outdoor wear, activewear, sportswear, and intimate apparel that looks and feels good.

It's tried and tested...

NILIT® BodyFresh's "feel-good" properties are delivered through the addition of a special additive. The efficacy of its antibacterial activity on dyed yarns has been clearly proven.

NILIT's Test Method

The fabric with the antibacterial yarn is placed in a dish that contains a specific amount of bacteria simulating the bacteria found in human perspiration. After 18 hours, the amount of bacteria is measured again. The percentage indicates the amount of bacteria that have been eliminated.

It's effective...

NILIT® BodyFresh's antibacterial additive inhibits the growth of bacteria by eliminating the bacteria that come into contact with the garment. That's why it's called NILIT® BodyFresh.

**When you're out there giving it your all,
you want a garment that -**

- Performs as well as you do
- Works while you work out
- Keeps pace with your active lifestyle
- Helps you keep your cool when the heat is on
- Frees you to do your best
